Timetable

Section 1: Monday 5 September 2022 10:00 - 13:00

Welcome and Opening

After the welcoming by the host organisation, a short “flashlight” will give each participant the opportunity to talk about her/his “state of mind” and expectations.

Presentation and agreement of the agenda

Marcus will present the agenda. Expectations and requests for changes will be taken up.

Clarifying the status quo

Marcus takes stock of the status quo of the project in an overview together with the partners. In doing so, he focuses on all project areas. The need for action is identified and a first look is taken at the project tasks still ahead of us.

Presentation of final platform and courses

Viktoria will present the final platform and show the beta version of the online courses in their virtual environment. The partners have the opportunity to get to know the platform in its intended appearance and to give preliminary feedback.

Section 2: Monday 5 September 2022 14:00 - 17:00

Planning testing activities

Viktoria will present a proposal for testing activities including deadlines, workshops, selection of participants, evaluation forms, etc. The project partners will develop a realistic and concrete perspective for testing the platform in their countries. Procedures for processing the testing results were defined.

Planning the final pilot evaluation

Viktoria will present a proposal on the final pilot evaluation and the adaptation of courses and platform if needed. The project partners will discuss it, deadlines were agreed.

Section 3: Tuesday 6 September 2022 9:00 - 13:00

Planning multiplier events and final conference

The projects will conclude with multiplier events in Cyprus, Italy, Poland, Slovenia and, at least, Germany. The events are described in detail in the application form, nevertheless the concrete implementation in each country must be discussed. The events will be re-scheduled.

Adjusting the project schedule

We came to the conclusion in the last online conference that the implementation of the demanding project plan needs more time than originally planned. After going deeper into the specific tasks, it is now possible to formulate a concrete and viable schedule for the tasks still ahead, which will be presented to the German National Agency after the TPM.

Summing up the meeting

The meeting will conclude with a review of the TPM and an short outlook on the next steps.

At the end of the meeting, a joint lunch is planned at 13:00.
