## **8.- THE CITY (Cáceres, España, 2016)**

These three pieces of art represent three different moments or circumstances the author had during the stay in Cáceres. The first one [picture on the left] represents the Morning twilight of the city. The technique use is oil on canvas. The second picture, a Water-soluble pastel [the middle one], represents the "Living city" and the third painting, the one on the right represents the Evening twilight. They have been conceived and painted during the visit to Extremadura University in July 2016, in Cáceres and surrounding areas (Spain) during an Erasmus visit. The Title of the project is The city. The paintings and colors are used here reflect the perception of physical and psychological realities through sight.
